Sage MAS ERP for Food and Beverage

Offers an extensive business software system for companies in the modern diverse and unpredictable market. Whether or not you process seafood, distribute fruits and vegetables, or offer vending services, this solution makes ease of your everyday processes. Moreover, it goes more than your core operations; Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage provides world–class business intelligence, CRM (Customer Relationship Management), Fixed Asset Management, and HR.Process Manufacturingand CRM.

Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage was designed to free you from the nuisance of taking care of disparate software systems and contending software intended for discrete manufacturing. You will have the ability confidently manage your business, plan for change (rather than merely reacting to it), as well as innovate operations on both a product and process level. This allows you to gain the competitive advantage in an industry where competition is being redefined.

Recipe and Formula Management

Properly stream recipe modifications throughout the system. Utilize features, which include key ingredients, for automatic quantity adjustments throughout the recipe. You may as well indicate formula visibility groups and formula change approvals to integrate controls into your processes.

Inventory Management

Effectively and efficiently measure and monitor inconsistently sized ingredients, using catch weights, to standardize your output. Lot traceability enables you to understand where your ingredients are coming from to aid with regulatory conformity and quality control. Multiple units of measure with UOM conversion will help you easily receive merchandise from vendors in their units of measure, after which select a different unit of measure that works best for your customers and internal processes.

Productivity Management

Batch yield calculations enable you to see how efficient your production operations are; split and inverted bills of material offer alternatives for you to make quick and accurate production assessments.

Compliance and Safety Management

MSDS (Material Safety Data Sheets) and nutritional labeling ensure that your employees and customers safe, and your business in compliance with regulatory entities. Lot and vendor traceability are key functionalities provided by Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage to guarantee compliance with federal regulations.

Quality Control

In order to attain and go beyond the expectations of the consumer, a quality management system needs to be in place and effective, and flexible enough to meet ever–changing trends. The system must also be deployed as part of your ERP software to ensure it forms the backbone of a system for guaranteeing product and process dependability and repeatability. Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage enables you to combine Quality Control procedures, sampling, and validation aspects into your standard work flow structure. Integrated product testing, statistical sampling, material physical property reporting, QC test hold, lot quarantine and recall; these are all solutions provided by Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage to let you gain control and maintain a consistent quality product. Visibility by other departments into these processes provides planning and response flexibility. For food producers who want to elevate their quality control measures even higher, there is electronic signature capability, formula change approvals, and specific access protocols for authorizing changes to controlled procedures and production procedures as they occur.

Regulations

Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage provides the platform and reporting required to achieve total compliance with an array of regulatory entities that address environmental effect, product quality, and employee security. A feature–rich and integrated ERP system delivers visibility that can: aid streamline and increase the level of communication among all stakeholders, deliver insight into market advancement trends, and acquire perspective from historical performance, enabling you to act quickly with precise information. You'll be in the driver's seat when it comes to effectively, efficiently, and profitably managing the balance between innovation and delivery reliability. Compliance is at your fingertips with an integrated ERP system such as Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage. The ERP software was designed to provide you with the system to enable you to meet the requirements of numerous regulatory entities without slowing down your day–to–day operations. You will have the ability to confidently meet the strict recall requirements of the Bio–Terrorism Act because Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage has made it convenient for you to maintain complete lot number traceability of each ingredient. Your production department will incorporate the true essence of cGMP, because you can leverage the quality control functionality and reporting accuracy of Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage. Define Critical Control Points as stages in a work order to guarantee compliance with the food safety requirements of HACCP; and ease the burden of an ISO9001 audit by integrating critical quality control factors into your standard work flow.

Warehousing, Logistics, & Service

For wholesale distributors and manufacturers of food and beverage products, complete inventory management control and optimization are critical. Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage delivers this with its warehouse management and inventory replenishment systems. Having the ability to segment your warehouses into zones and bins, you can improve efficiencies and help ensure that highly perishable merchandise are preserved and locatable. Having the ability to set appropriate replenishment points per item and account for seasonality, you will be sure to keep the leanest inventory while maintaining your customer service levels.

Logistics and EDI

To build up better relationships with customers and vendors, EDI (Electronic Data Interchange) is offered to instantly exchange order information. And to help ensure a timely and cost–effective delivery, Sage MAS 90 and Sage MAS 200 ERP for Food and Beverage offers LTL shipping and integrated rate shopping for leading carriers.

Warehouse Maintenance and Field Service

Integrated service management enables food and beverage distributors to competently handle inventory of replacement components as well as the field maintenance of high–asset equipment, such as refrigeration units, kitchen equipment, and beverage dispersing units. It also permits effective management of resources, which include parts and tools, and the schedule and dispatch of installation and service technicians.

Financials, CRM, & HR

Financials

Sage MAS90 and Sage MAS 200 ERP for Industrial Equipment, Supply, & Service gives power and dependability as a result of the core accounting modules: General Ledge, Accounts Payable, and Accounts Receivable. This powerful, versatile, and scalable end-to-end management application likewise provides secure as well as proven programs to improve the bar of superiority in the areas of HR Management, Fixed Assets, and CRM.

CRM (Customer Relationship Management)

This is an additional method to stay ahead of the competition. Proactively looking for new customers, and sustaining strong relationships with the customers you have worked so faithfully to win, is a continuous undertaking. Your business can thrive with an integrated set of tools like those offered in our integrated CRM system, to keep track of your relationships, updates of various campaigns, and incorporated customer-product order history.

HR (Human Resources)

For numerous companies in the Industrial Equipment, Supply, & Service industry, your human resources are your single largest asset and expenditure. Having a completely automated HR system ensures that you efficiently take care of benefits and provide value to the individuals in your organization. And, if you want to add payroll as part of your end-to-end system, Sage MAS 90 and Sage MAS 200 ERP for Industrial Equipment, Supply, & Service allows you to choose between an internal or external payroll system.

Business Intelligence

The rate of business and breadth and depth of regulatory compliance demand a flawlessly integrated system. Related information is the key factor. Business Intelligence available as customizable, insightful reporting and live dashboards is a significant differential for Sage Software in the Industrial Equipment, Supply, & Service industry. The sooner you spot trends in your business, the sooner you can react and stay ahead of your competitors.
