*e-business powered by JobOps, working with Sage e-Business Manager, lets users manage jobs with more flexibility over the Internet.*

## Better Access for Customers, Employees and Partners to Jobs

When your business works in a collaborative way with customers, corporate, field personnel and partners, you benefit from the ability to complete jobs faster and more accurately. If your business depends on this close collaboration you'll want to consider making Internet access to jobs a high priority.

e-business powered by JobOps and Sage e-Business Manager provides fast, secure Internet access to critical job-related data for customers, employees and partners. The integration is simple to use and transparent to users, letting you leverage the Internet to get jobs done on-time and more profitably.

## Key Benefits:

- The JobOps **.Configurator** allows your sales staff and customers to use the power of the Product Configurator over the Internet. Users can take advantage of the Sage e-Business Manager shopping cart technology, configure custom products, secure a quote, and even submit orders all through your secure web site.
- Your employees can use the **.Labor** applet to enter time directly to jobs by accessing the JobOps Time Tracker module over the Internet. This option is ideal for field service personnel who do not have direct access to Sage MAS 90 or MAS 200.
- Using the **.Job Tracker** you can minimize calls from customers seeking the status of their jobs by providing on-line access to this information from your secure Web site. They will be able to see the completion status of all the steps related to their job, thereby freeing up your valuable support resources.

# Features

## Fully Secure

Access to the Internet-based applications of the Sage e-Business Manager and JobOps integrated modules is secure and available to only those customers or personnel that have permission.

## Shopping Cart

Combining the e-Business Manager .Order applet and the JobOps .Configurator applet allows customer to configure their custom job options online, securing current pricing and saving their configuration to the shopping cart.

## Shop Floor Labor

Shop floor data collection is made easier using Internet access to labor reporting without impacting internal networking resources.

## Job Status

Detailed job status including work completed and scheduled is available to your customers so that they can have confidence that their jobs are being handled in the most efficient manner and delivered on time.

## Job Costing

Management can review current job costing from remote locations to stay on top of job profitability while traveling or working from home.

## Field Labor

Installation crews and field service technicians can report on labor from the field directly to the job to facilitate faster and more accurate labor costing and billing.

## Leverage Concurrent User Licenses

Using the integrated Sage e-Business Manager with JobOps uses a single license on the Sage MAS 90 or Sage MAS 200 system, but allows multiple users access to the system through a single port.

## Powered by JobOps

The Powered by JobOps program features several add-on modules that can be added to the base JobOps Job Management Software. These products give your business additional functionality in managing scheduling, tracking, configuration and e-business for JobOps and Sage MAS 90 and Sage MAS 200 systems.

## About JobOps and Synergistic Software

JobOps is a suite of integrated modules for the award-winning Sage MAS 90 and Sage MAS 200 ERP systems and is published by Synergistic Software Solutions, LLC, a wholly-owned subsidiary of BDO Seidman, LLP.
